

# AEROMAC

more than diffuser & impeller

---

## PERFORMANCE & PRICE LIST

---

SINCE - 2003

## COMPANY PROFILE

Aeromac Industries Pvt. Ltd. a name synonymous with Injection Molded Plastic Components for the Submersible pump. Industry was started in 2003 as a molding unit in Rajkot.

With over a decade of association with the leading supplier in India for quality pump components in engineering plastics.

Aeromac is Saurashtra based entity that offers superb quality Impellers and Diffusers in Noryl glass filled material and Manufacturing Facility for Tooling, Injection Molding, Ultrasonic Welding and Secondary Operations.

## MANAGEMENT

Our organization takes immense pride in its team of highly diligent and qualified professionals, each of whom has been carefully recruited for their expertise, dedication, and commitment to excellence. These professionals consistently invest their time, energy, and hard work into developing our entire product range, ensuring it aligns seamlessly with the latest market trends and innovations. From concept to completion, their meticulous attention to detail plays a pivotal role in creating products that cater to the evolving demands of the industry. Each team member strives tirelessly to deliver offerings that adhere precisely to the detailed specifications provided by our esteemed clients, thereby ensuring their exact needs and requirements are not only met but exceeded.

Additionally, we are equipped with a spacious and well-furnished infrastructure, which serves as the backbone of our operations. Our advanced facilities include a state-of-the-art manufacturing unit, which is pivotal in enabling us to fabricate products of unparalleled quality. This infrastructure also houses cutting-edge testing mechanisms, which allow us to rigorously evaluate and ensure that every product adheres to stringent quality standards. Our collective efforts, backed by this robust infrastructure, empower us to deliver a range of products that are not only innovative but also reliable and enduring, earning the trust and satisfaction of our clientele.

## **HISTORY REPEATED AGAIN**

Since 2003 Aeromac Industries Private Limited is a leading manufacturer and supplier of Injection Molded

Engineering Plastic Components for various Industries like submersible pumps having compliance with the

ISO 9001:2015 standards.

## **WHAT MANUFACTURERS ARE LOOKING TO BUY DIFFUSER & IMPELLER ?**

- 1. Material Quality :** engineered plastic materials like noryl
- 2. Efficiency :** High-performance designs for smooth flow and energy optimization.
- 3. Compatibility :** Precise fit and alignment with existing systems or industry standards.
- 4. Reliability :** Proven durability, strong warranty, and technical support.
- 5. Cost-Effectiveness :** Competitive pricing with long-term value and bulk discounts.

## MANUFACTURING FACILITY

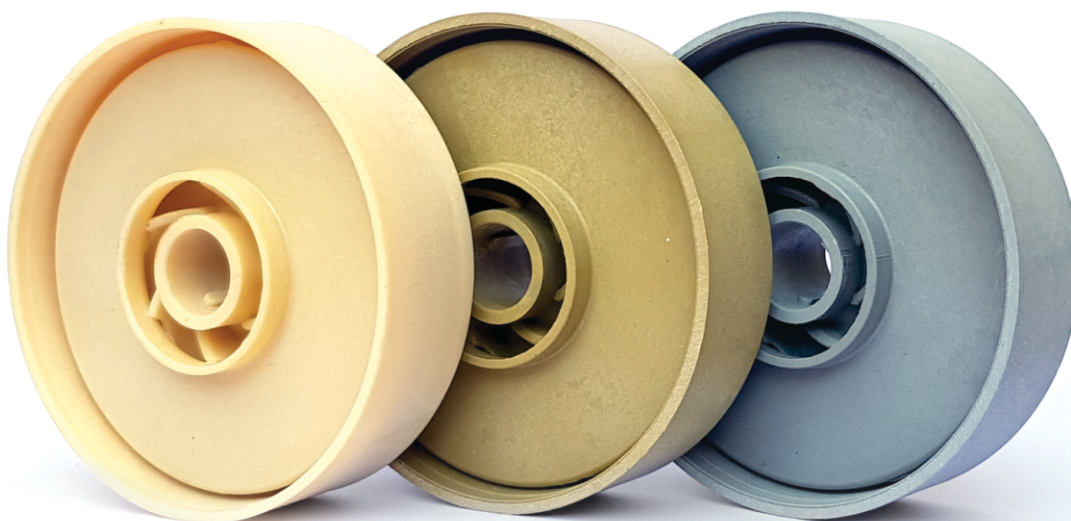

Aeromac Industries is a trustworthy entity involved in rendering credible Manufacturing Facility for Tooling, Injection Molding, Ultrasonic Welding and Secondary Operations to our clients. Tooling We are among the top ranked service providers of the best quality Tool Design Services. Our brand Aeromac has recruited a skilled and understanding team to support in the design of various kinds of tooling which are widely used in different kinds of industries.

Blessed with the leading-edge technologies, our Automation Tooling System solutions assist companies to successfully handle the business and production flow. Known for abrasion resistance and deformation at elevated temperatures, these tooling are highly durable and conform to the international quality standards. In order to fulfill the ever growing needs and demands of our clients, this range of metal working tools is made available in various shapes and forms. Injection Molding our conglomerate Aeromac is engaged in offering effective manufacturing facilities for Injection Molding. This immaculate range of Injection Molding is reckoned for its quality, safety and utility. Also, we provide effective solutions of metal injection molding in the varied shape and sizes as per the detailed specification given by our clients. The supreme quality Plastic Injection Molding Components are developed with the help of best technology and fine raw material.

## SERVICES

Our valued clients can avail from us a vast range of Submersible Pump Parts. These Industrial Submersible Pump Parts are manufactured using highly advanced technology machines. This immaculate range of water pump parts is highly appreciated by the clients belonging to different industrial sectors. These parts are fabricated from premium components in order to assure high strength to the structure.

Also, conforming to the illustrated parameters of the industry these electric submersible pump parts are available in different grades and sizes. Our range of Submersible Pump Parts is highly appreciated for its remarkable attributes such as longer service life and high compressive strength. We can provide complete customization of these products to suit clients' specific requirements.

### **V3 - Bowl Impeller Set**

Available in various models like 65mm & 70mm outside Diameters

Material used PPO (Noryl) 20% glass filled.

Available in Virgin & Re-process Material.

### **V4 - Bowl Impeller Set**

Available in various models like Cora 1, 2, 4, 5, 7,10,12,18 ( High flow & High head )

Also R - series & J - series Designs Available.

Material used Noryl 20% & 30% glass filled.

Available in Virgin & Re - process Material.

### **V6 - K Type Deccan**

K Type Impeller has a various outside diameters like 30, 40, 50, 60, 80, 100, 120

### **Openwell Impeller**

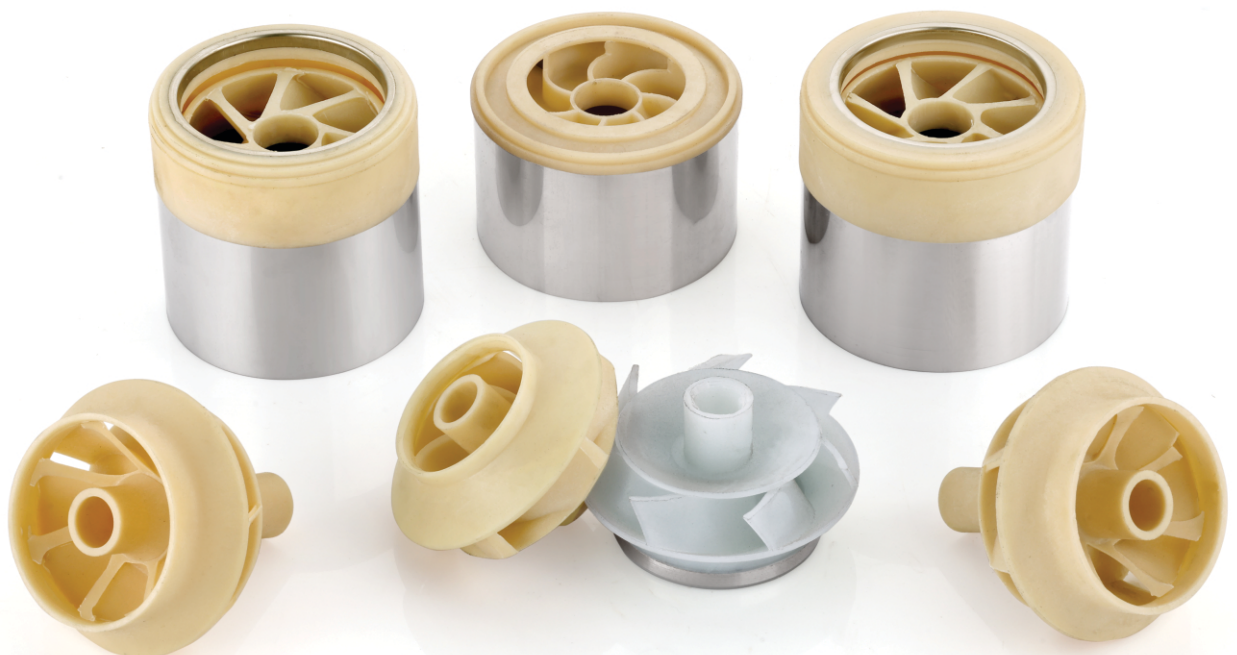

Available in 0.5 H.P. and 1.0 H.P.

### **Shallow Well Diffuser & Impeller**

Available in 0.5 H.P. and 1.0 H.P.

### **Pump Spare Part Accessories**

Top Dol, Middle, Suction Plate, etc...

## PRICE LIST

- Cum Our Mfg. From Strong Engineering Polymer With 20% -30% GF & We Also Customize as per Your Requirement
  - Note: Performance Chart Varies Accordingly Raw Material Used In Submersible Motor + Condition Of Power Supply.
- Performance at 2850 RPM
